

JOSÉ PAJUELO TRAVEZAÑO

SOFTWARE ENGINEER | FULL-STACK & AI PRODUCTS | PRODUCT OWNER

(+51) 932-713-461 | josepajuelotr@outlook.com | [LinkedIn](#) | [GitHub](#)

Full-stack developer and product owner with a background in economics, public policy analytics, and a Master of Science in Computational Analysis and Public Policy from the University of Chicago. Experience taking data and AI products from problem framing and MVP scoping through backend architecture, relational data modeling, frontend workflows, deployment, and stakeholder delivery. Builds with Python, FastAPI/Flask, JavaScript, HTMX, PostgreSQL, and Docker, combining hands-on engineering with product prioritization and measurable process improvement.

EDUCATION

The University of Chicago

Chicago, IL

M.S. in Computational Analysis and Public Policy

Aug 2024 - May 2026

Coursework: Software Engineering, Web Development, Databases, Generative AI, Machine Learning, and Human-Computer Interaction.

National University of San Marcos

Lima, Peru

B.A. in Economics

2011 - 2016

TECHNICAL & PRODUCT SKILLS

Product ownership: MVP scoping, product roadmaps, requirements prioritization, user workflows, cross-functional delivery

Programming: Python, SQL, JavaScript, HTML/CSS, pandas

Full-stack development: FastAPI, Flask, Jinja, HTMX, REST APIs, Streamlit, D3.js

Data and storage: PostgreSQL/Supabase, MySQL, SQLite, SQLAlchemy, ETL pipelines, relational schema design

Applied AI: OpenAI API, LangChain, RAG, FAISS, OCR, NLP, Vision Transformer, Replicate

DevOps and tools: Docker, Jenkins (CI/CD), Git, AWS fundamentals

Languages: English fluent, Spanish native

PRODUCT & ENGINEERING EXPERIENCE

Ayllu Horizons

Jun 2026 - Present

Founder, Product Owner & Full-Stack Developer

Lima, Peru

- Own the MVP roadmap for an education technology platform supporting student and educator workflows; prioritize role-based authentication, student onboarding, interest assessments, educator dashboards, and AI-generated career explanations.

- Design and build the application end to end with FastAPI, Jinja, HTMX, and PostgreSQL/Supabase, covering backend services, role-based access, data models, frontend workflows, and deployment.

- Translate student and educator needs into product requirements, interface flows, and incremental releases.

Open Peru

Mar 2026 - May 2026

Python, Flask, JavaScript, SQL, SQLite/MySQL, pandas, OCR

- Coordinated product delivery for a six-person team, prioritized requirements, and connected user needs with the data model, backend services, and application interface.

- Designed an end-to-end ETL workflow that converted scanned Peruvian Congress documents into clean, validated, and searchable relational data.

- Developed Flask backend routes and SQL queries to expose structured data to the frontend, and implemented entity-matching controls to improve consistency and reduce duplicate records.

ArtRoom AI

Oct 2025 - Dec 2025

Python, LangChain, RAG, FAISS, OpenAI API, Replicate, Streamlit

- Built a [web application](#) combining a source-grounded chatbot with text-to-image and image-to-image generation.

- Implemented retrieval workflows with LangChain and FAISS and integrated OpenAI and Replicate APIs within a modular backend architecture.

- Fine-tuned and deployed a diffusion model using a curated dataset of 30 Pancho Fierro images to generate custom outputs in the artist's visual style.

Data Science Clinic at UChicago | Document Intelligence

Mar 2026 - May 2026

- Developed and evaluated a Vision Transformer classifier for letters, forms, identity documents, receipts, and text pages.

- Built a modular processing workflow integrating OCR, PII detection, automatic summarization, and thematic classification.

PROFESSIONAL EXPERIENCE

Chicago Public Schools
Data & Analytics Intern

Chicago, IL
Jun 2025 - Aug 2025

- Built automated SQL and Python workflows for multi-table warehouse data, reducing analytical report generation from two days to approximately three hours.
- Replaced fragile legacy code and manual validation with an automated reporting system that produced personalized PDFs for 1,000+ users and reduced delivery time from one week to 20 minutes.

Ministry of Economy and Finance
Consultant, Budget Department

Lima, Peru
Oct 2023 - Jul 2024

- Converted findings from 50+ research studies into standardized data and a Power BI dashboard for executive budgeting decisions, aligning requirements with technical and non-technical stakeholders.
- Designed experimentation and performance-measurement frameworks and coordinated implementation standards across teams.

Data Analyst, Public Investment Department

Aug 2022 - Sep 2023

- Formalized data governance for a national planning process through workflow documentation, KPI definition, data lineage, and monitoring standards, improving clarity and on-time delivery.
- Built a behavioral monitoring system for 1,600+ institutional users that increased compliance with required activities by 30%.

Economic Analyst, National Council of Competitiveness

Oct 2018 - May 2021

- Managed the functional design of the first [AYNI](#) web application, translating user requirements and reporting needs for the technical team.
- Designed a national monitoring system for 84 strategic initiatives, including standardized data collection and KPI frameworks.

Ministry of Education
Data Analyst, Planning and Budget Unit

Lima, Peru
May 2021 - Aug 2022

- Automated weekly processing of operational and financial data across 12,000+ institutions and built performance indexes used to prioritize interventions and resource allocation.
